

DID YOU KNOW:

That the perf 12½ of the 3c small Queen is not known in the Rose shade, but that all known copies of this stamp are Indian Red. (N. Bond)

That the possibility of the same perf variety existing in the 1c Orange shade is based on the fact that the 1c and 3c were printed at the same time, although the 1c did not appear until later, after the large 1c was used up.

That there are four different kinds of booklets of the 3c Red 1943, with panes of four. There is the original one with the leaf reading 'only 6c more for air mail etc'; second, there is the one which shows the old rate barred out and the new rate printed below; third, there is the one which does not have this leaf which shows the reading matter; fourth, there is the one with this leaf showing the new 7c rate quoted in the correct manner. I came across an unopened package of booklets in a small Post Office, just as it was received from the Government, and these showed no leaf on which the rates appeared.

(C. B. D. Garrett)

That you can add to our listings of Newfoundland Revenues this new variety which is reported by Member Raymond R. Smith, of Fort Wayne, Indiana. He has a copy of the King George V issue which is perforated 10¼ and measures 21¼ x 28¼mm.

That our Member Robert Rupp, who conducts his stamp business as the Robert Fulton Stamp Co., will now do his selling from 1005 Chestnut Street, Philadelphia 7, Pa.

That a list of Excise Tax Stamps available has been issued from the Collector of Customs-Excise, 174 Wellington Street, Ottawa, Ontario. This list includes some overprints on the 2 Leaf, 3 Leaf and King George V, Head: Series of 1915; Series of 1922, 2 Leaf; Series of 1935. Also booklets, rolls and imperforates.

That one of our members recently brought a 'lot' of stamps and it contained a 'rarity' which was not even considered in the evaluation of the lot. The full story will appear in a future issue of the **Topics**.
